Presenter: Julia Osteen, Technology Integration Specialist, Ayers Institute for Teacher Learning & Innovation at Lipscomb University, julia.osteen@lipscomb.edu

Session description: We know that new tools arrive on the scene every year and there are new advances in infrastructure which makes integrating technology in the classroom a moving target. Tech coaching can help teachers navigate these changes. In this session, we will explore some best practices for technology coaching, consider what it means to coach a colleague on their use of technology for learning, and identify what it really means to build capacity in colleagues. Session participants will leave with a vision for showing up first as "coach" to enhance their own work and the work of their colleagues.
